JAVASCRIPT UNCONFERENCE

Dear Madam/Sir

In Spring 2014 the **BOOT - Best Of Open Technologies e.V.**, which has also organized the PHP Unconference for the last seven years, is organizing the JS Unconf - a JavaScript Unconference.

The organizers are expecting 250 attendees from Germany and the rest of Europe. The target audience of the two day event is developers and consultants, who use JavaScript as frontend language and also deploy JS as a server-side scripting language in a professional and hobby context. A number of core developers of popular JavaScript frameworks and leading members of the JavaScript community are expected to attend the event next year.

Previous Unconferences offered a great number of sessions, the quality of which was on a par with professional conferences.

To ensure that this event is as successful as in previous years the PHP Unconference, we need your help! Our goal is to organize a well rounded and highly polished event. We have attached further informations to this PDF file, which offer an overview of the various sponsoring options.

If you have any questions, or if we can assist you in any way, please do not hesitate to contact us.

Yours faithfully,

JS Unconf - OrgaTeam
